

TechEdu eLMS

Products:

eLMS

eLMS is a hosted learning management system that allows you to quickly manage and deploy eLearning and distance learning content and traditional on-site training. TechEdu is responsible for the hosting, therefore you don't have to worry about the technology or a drawn out implementation process. TechEdu provides ongoing support to ensure rapid and seamless deployment.

eLMS is secure; Login and personal information is encrypted using a 128 bit SSL certificate that protects your collected data behind our firewall. Additionally, eLMS pricing makes good financial sense with minimal start-up costs and predictable fees.

eLMS Functions

- eLMS handles registration and enrollment processes
- eLMS keeps track of learner progress and performance
- eLMS schedules events both online and in “bricks and mortar” settings
- eLMS manages all of your learning assets including traditional training facilities and instructors
- eLMS reports and tracks progress, assessments and usage
- eLMS is a communication and collaboration tool
 - Posted announcements and articles
 - Virtual classroom and conference room
 - Document sharing

eLMS Benefits

- Minimal I.T. investment or resources needed
- Rapid return on investment when compared to traditional training
- It has your look and feel > *Branded to look the way you choose*
- It is an inexpensive tool for bringing together geographically dispersed groups of students
- Very flexible > training can be delivered to anyone anywhere
- Can handle any SCORM compliant eLearning content
